## **Help Reduce Health and Safety incidents and Workplace accidents for only \$88**

We are excited to announce the release of an important, new and highly cost-effective candidate background verification assessment designed to reduce the occurrence of Health and Safety incidents – the **Health and Safety Indicator (HSI)**.

Safety in the workplace is critical to the success of any business and a commitment to OH&S can only be generated by involving everyone in the process. Therefore, while the environment and safety culture of an organisation play a role, an individual's commitment to OH&S is also very important. Evidence has demonstrated that a high score on the HSI, which incorporates a range of personality and intellect measures, correlates with:

- Fewer accidents
- Lower accident & mortality rates
- Fewer deliberate safety violations
- An overall lower accident risk
- Lower incidence of workers compensation claims

### **Key HSI measures reported include the candidate's**

- Understanding of Instructions
- Checking & Attention to Detail
- Understand of the Safety Environment
- Safety Motivation
- Safety Diligence
- Adherence to Rules
- Openness to Guidance
- Safety Confidence
- Safety Composure
- Overall OH&S Assessment

The HSI on-line assessment takes approximately 30 minutes to complete in either a supervised or unsupervised environment. The comprehensive report is available within one working day or less and provides you with the ability to identify candidates who may present a potentially high Health and Safety risk. The cost to do this assessment is only \$88 per person (inclusive of GST).
